

STCC

South Texas Curriculum Consortium

South Texas Curriculum Consortium (STCC) is a group of 23 public school districts that pooled their money for the purpose of bringing in high quality professional development at an affordable price. The goal is to build teacher capacity and positively impact almost 38,000 students in this region. In addition, STCC members receive products that have an immediate effect on student learning when they are used appropriately in the classroom. STCC teachers have Focused Instructional Guides (FIGs) for all Readiness Standards in all 4 core subject areas in grades K-EOC. The FIGs contain high-yield instructional strategies that actively engage students in those “hard to teach, hard to reach” TEKS.

Teaching vocabulary with a common language ensures that students have a well-aligned foundation for the academic content required to access rigorous learning. When all the teachers in a system use high-yield instructional strategies to deliver vertically aligned academic vocabulary, students have a solid foundation for comprehension. The STCC vocabulary tool includes Tier 1, 2, and 3 grade level words extracted from content and rooted in the TEKS. Teacher usability is the goal for the final product design. Math, ELAR, Science and Social Studies vocabulary are complete and can be accessed using the links below.

Participating districts are able to access FIGs, academic vocabulary, training materials and other related resources by clicking on the subject and grade level in the table below. All materials and resources are the property of STCC member districts and may NOT be shared with anyone not affiliated with STCC.
